Although the greatest risk of an earthquake is in the northern part of the state, in the event of an occurrence, you should Drop, Cover and Hold On to the leg of a table or desk. Pick a safe place in every room of your home, such as under a sturdy table, desk, near an interior wall away from windows, bookcases or tall furniture that could fall on you. Remember, earthquakes can happen at anytime, they don't have a particular season. For more information go to www.msema.org
